

# Water Efficiency + Energy Efficiency = \$\$ SAVINGS

*With the irrigation season upon us, the Agricultural Pumping Efficiency Program at Fresno State and the Department of Water Resources would like to remind you that now is the perfect time of year to have your irrigation system evaluated. The Eco/Mobile Irrigation Laboratory will show you how to **save water**, **save energy** and in the long run **save money** on irrigation costs – often at little or no cost to you. Less water pumped can lead to lower energy costs and that adds up to savings in your pocket! So make an appointment today with one of the many labs across the state.*

- **Santa Barbara County**
